Important Safety Instructions

This product has a polarized plug (one blade is wider than the other) as a feature to reduce the risk of electric shock. This plug will fit in a polarized outlet only one way. If the plug does not fit fully in the outlet, reverse the plug. If it still does not fit, contact a qualified electrician. Never use with an extension cord unless plug can be fully inserted. Do not alter the plug.

Installation:

Preparation

- Mark the position of the mounting holes according to the mounting hooks.
- Pre-drill holes at marked locations and attach mounting hooks with wood screws (included) to horizontal surface.
- Always consult a qualified electrician
- Shut down power. Ensure that power is disconnected / disable

Caution:

To reduce the risk of fire, electric shock, or injury:

- Disconnect power to the unit prior to installation.
- Use only insulated staples or plastic ties to secure cords.
- Route and secure cords so that they will not be pinched or damaged when the cabinet is pushed to the wall.
- Not intended for recessed installation in ceilings or soffits.
- Not intended for surface installation in enclosed cabinetry.
- The National Electrical Code (NEC) does not permit cords to be concealed where damage to insulation may go unnoticed. To prevent fire, do not run cord where it may be inaccessible for examination.
- Cords should be inspected periodically for wear or damage.
- Do not look directly at the lighted LED.
- Do not operate lamp with a missing or damaged lens.
- The LED lamps inside the fixture are not replaceable.

1. Place fixture in desired location.
Use the mounting hooks (plastic/metal) to hold the fixture.

2. Install the fixture by inserting into the mounting hooks.
