

NADAIR®

A modern interior scene featuring a red and white lounge chair by a large window with a view of a green landscape. The chair is positioned on a light-colored rug, and the floor is made of polished wood. The window looks out onto a lush green valley with mountains in the background under a clear blue sky.

**SIMPLIFIED AND
HEALTHIER LIFE!**

www.Nadair.com

A SOLID REPUTATION

Known since 1980 for its European concept of matching ceiling fans and lighting with home décor trends, Nadair is also a long-time manufacturer of central vacuum systems.

Nadair North America is headquartered in Laval, Canada. Strategic for both air and ground transportation, this location also gives the company an edge in both European and North American cultures and markets. Our exclusive partner in France helps us stay a step ahead of new trends—a key piece in our enviable reputation as manufacturers of innovative electrical products.

A SUCCESSFUL VENTURE

As a vertically integrated company, at Nadair, we control every aspect of our production: from the initial design to quality control, marketing and distribution. Thanks to this structure, our company offers products tailored to our customers' needs. Uncontended quality, inviting design and enticing prices are among the reasons we are leaders in our industry.

DESIGN ORIENTED FOR A SIMPLIFIED LIFE

Our sleek spun-aluminum system's inviting curves recall modern luxury appliances. Their innovative European features discretely fit into your customer's day-to-day lives, enhancing quality of life. Our models soft-start technology is easy on our world-renowned motors, while our soft-delayed stop technology means hoses empty in the debris canister, not on the floor.

Three times more powerful than industry standards for portable machines, our long-lasting motors and power units are also among the least intrusive available—so quiet, actually, you can hold a conversation next to our powered-on units.

Our hose design is no exception to our European attention to detail. Our swivel wall-mounted end cuff and swivel handles make cleaning quick and carefree. Gone are the irritating pinched or rolled hoses—a true innovation Nadair brings to the vacuum cleaner industry.

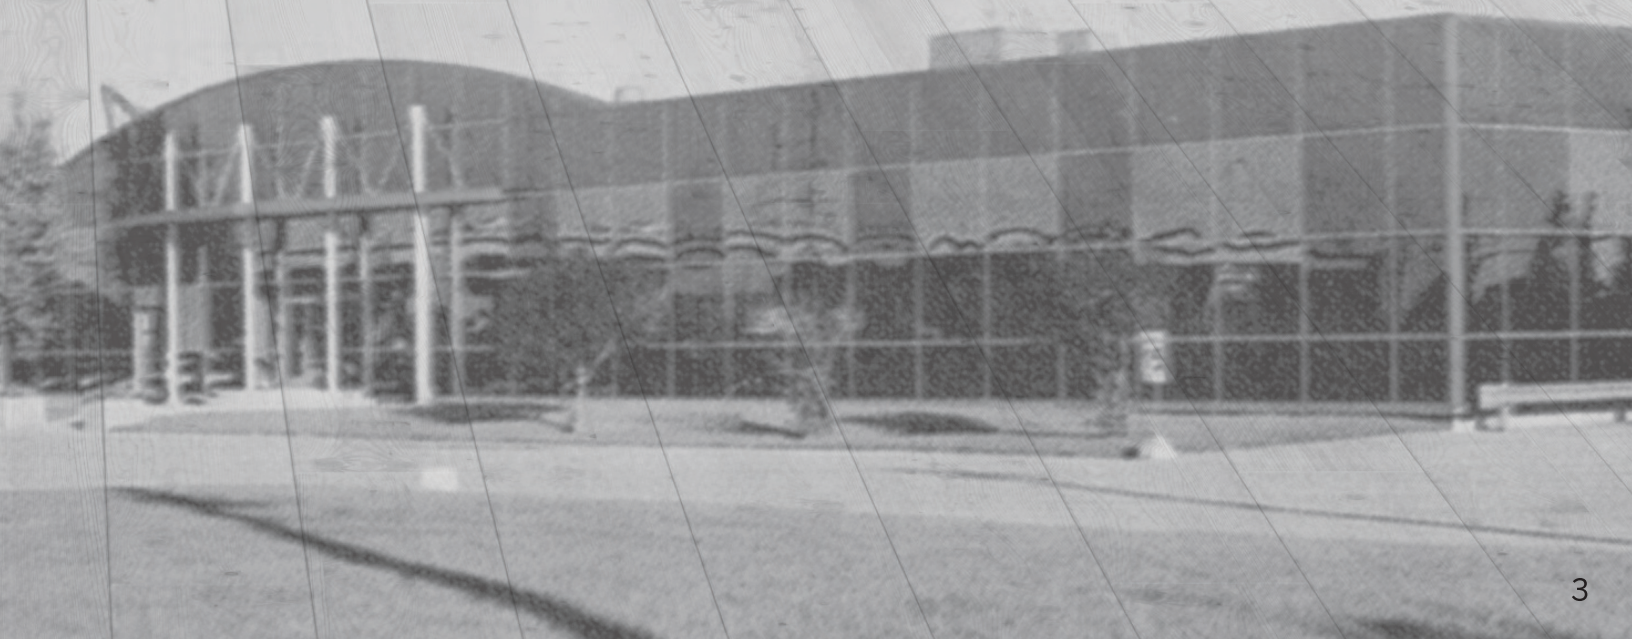

Our exclusive European-kitchen concept makes it easy to quickly vacuum up those morning toast crumbs. It also allows owners of homes 2,300 sq. ft. or smaller to use this same kitchen vacuum to clean the whole house from just one inlet.

Our attachments adapt automatically from bare floor to carpet. Our premium brush attachments are made only of horsehair, a traditional yet rare mark of quality.

FOR A SIMPLIFIED AND

HYBRID FILTRATION

With its top-of-the-line filtration, Nadair central vacuums will improve air quality in your home. Since their high-efficiency filtration systems are 99.97%, our vacuums may reduce your allergy symptoms and respiratory problems.

Using high-efficiency cyclonic filtration (99.97%) and disposable filtration bags, our vacuums filter vitiated air twice, greatly improving exhaust air quality. When our cyclonic filtration is combined with a permanent machine-washable filter, our units filter exhaust air up to 99.97%.

Triple-layer filtration bags conveniently dispose of waste in the dirt receptacle without stirring up harmful airborne dust. This system filters vacuumed air up to 99.97%. The three layers of the filtration system prevent the bag from ripping.

TECHNOLOGY AND INNOVATION

Whichever Nadair central vacuum unit you choose, you will be cleaning with cutting edge technology!

Our soft-start technology adds 20% to the life expectancy of your NADAIR product's motor (over traditional central vacuums). Our soft-stop three-second delay technology vacuums debris out of the hose. This keeps left-over debris from emptying onto the floor and the elbows of the piping network from getting clogged.

Silent power units also make for healthier lives. To enhance our initial design choice of a quieter and more-efficient motor, we added a noise-blocking foam, like that found in recording studios. Once installed in a closed space, our systems make about as much noise as a wall-mounted air conditioning unit.

HEALTHIER LIFE!

PAYING ATTENTION TO EVERY DETAIL

Our hand-spun aluminum vacuums are robust, yet lightweight. Created with a welding-free cold-spinning technique, our products are optimally solid and non-corroding. Since most central vacuums are installed in damp places, like basements and garages, this attention to detail makes Nadair central vacuums a first choice for durable and long-lasting systems. What's more, aluminum conducts more than half the static electricity of plastic and steel. This means maintenance is also halved!

At Nadair, we have reviewed every element of our design with an eye to our units longevity. We leave nothing to chance. Here are a few examples of NADAIR's attention to detail:

- Our heat protection feature prevents our motors from overheating.
- Our innovative one-piece air-containment gaskets prevent air loss and reduced suction over time

- Our exclusive installation bracket is equipped with rubber vibration and noise-cancelling inserts
- Our debris-canister latches can be installed anywhere on our cylinders, making it easy to empty and put your unit back into its difficult-to-access spot.

EXCLUSIVITY

We understand our customers are looking for personalized systems tailored to their everyday needs. Our dedicated team of authorized dealers and installers will guide you to the central vacuum system that suits your needs.

In addition to this local contact, our bilingual customer service team will be happy to answer any questions

HYBRID: FULL-SIZE SYSTEMS

POWERFUL

- Vigorous *2-Stage Motor*
- *SOFT-START TECHNOLOGY* –
Extends product life by 20%¹

SILENT

As quiet as your
air-conditioning unit²

HYBRID FILTRATION

- Cyclonic filtration with
no loss of suction
- Triple-layer *disposable filter
bags* (22.5 L / 5.8 gal. capacity)
- Empty once or twice a year

SMART CONTROL PANEL

- *SOFT-STOP TECHNOLOGY* –
Vacuums all debris out of the
hose, thanks to a 3-second
timed delay
- *LED STATUS INDICATOR* –
Informs users of product status
(time to empty the debris
container, to change the bag
or for maintenance)

BOTTOM-LOAD MECHANISM

Ensures access for emptying the
32 L. or 8.5 gal. dirt receptacle or
replacing the disposable bag, even
when the unit is installed up high.

Depth:
360 mm / 14.17 in

RETRACTABLE HOSE SYSTEMS

NO MORE CARRYING, COILING OR STORING A BULKY HOSE AGAIN.

Now you can **eliminate carrying a bulky hose** up and down stairs or from room to room. (No storing it either!) Simply pull out the length of hose needed for the job, connect your choice of attachment and begin vacuuming. It's that easy. When finished, the system **uses the suction from the central vacuum power unit to retract the hose** into the PVC tubing installed in the walls of your home.

Behind each inlet valve, up to 50 feet of central vacuum hose can be stored in the tubing within your walls. Since longer hoses can also be used (one hose covers up to 2,300 square feet), Hide A-Hose reduces the number of inlet valves required for whole-house coverage. This will save you installation time.

No more dragging a hose from inlet to inlet. No more carrying, coiling and storing a bulky hose. Simple cleanups are just that: simple!

*A retractable
hose system
covering up to
2,300 sq. ft.*

*Install one in the
kitchen cabinet for
quick cleanup!*

IN-CABINET VACUUM CONCEPT

Nadair's exclusive in-cabinet vacuum concept is a must-have for those without space to store a central vacuum system or for people looking for a **quick-and-easy kitchen cleaning** option.

If used with a retractable hose system, your entire installation will require **less space** than a canister or upright-portable vacuum.

Ideal for condos, studios, high-end rental properties, recreational vehicles and boats.

*A toe-kick
activated inlet for
quick cleanup
with the broom
attachment*

ACCESSORIES AND OTHER PARTS

Available in 3 lengths

UNIVERSAL REPLACEMENT HOSES

LOW-VOLTAGE HOSE: ACCHO-30/35/40LV-SW

- Fits in most inlets
- ON-OFF feature on the handle
- Available in lengths of 30', 35', 40'

**ANTI-KINKING
MECHANISM**

HIGH-VOLTAGE CARRYING HOSE: ACCHO-30/35/40HV-BK

- Fits into most inlets
- ON-OFF feature and on-off for carpet beater feature
- Available in lengths of 30', 35', 40'
- Convertible hose with a wall-mounted end cuff for super-valve inlet systems (sold separately)

HOSE ACCESSORIES

UNIVERSAL PADDED HOSE COVER: ACCHO-COV30/35/40ZIP-GY

- Machine washable
- Easy-to-install/uninstall zippered hose cover
- Available in lengths of 32', 37' and 42'

HOSE EXTENSION: ACCHO-15LV-EXT

Low-voltage hose extension of 15 feet for special cases where longer is needed.

TRUE HEPA DISPOSABLE FILTERS

Convert your system to the highest standard in the filtration industry. true hepa filtration is the same filtration grade as that used in hospitals.

FP-8-HEPA: HEPA filter for 600AL-22 and 700AL-22.

FP-12-HEPA: HEPA filter for 700AL-32, 655AL-32 and 600AL-32.

TRIPLE-LAYER DISPOSABLE FILTRATION BAGS (pack of 3)

FD-12.5L-3-NAD:

Disposable filtration bags. 12.5 L/3.2 gal. for 600AL-18, 700AL-18, 600AL-22, 700AL-22.

FD-22.5L-3-NAD:

Disposable filtration bags. 22.5 L/5.8 gal. for 600AL-32, 655AL-32 AND 700AL-32.

WARRANTY

The **Nadair Warranty** on the central vacuum system & power unit is only valid for the original owner and is non-transferable. The use of electrical power other than prescribed on the unit and/or any repair(s) made by other than authorized service person will render this warranty null & void. The warranty will also be null & void if the system and/or its accessories have been used on wet surfaces. This warranty is for residential application only; this warranty does not cover commercial or industrial usage of the product. Proof of purchase is mandatory.

The Central Vacuum Power Unit Body - Lifetime (25 years)

Nadair will, at no cost, for twenty five (25) years repair or replace any defective parts of the central vacuum body, housing & dust bin as long as you own it if, used in normal conditions and properly maintained as stated in the power unit instruction manual.

The Central Vacuum Power Unit's Motor & Module - Ten (10) years

Nadair will, at no cost, repair or replace any defective motor or electronic module of the central vacuum power unit for the first ten (10) years following the purchase date if, used in normal conditions and properly maintained as stated in the power unit instruction manual.

Cleaning tools, carpet brushes and flexible hoses, five (5) years

The cleaning tools, the carpet brushes and the flexible hoses used adequately and in normal conditions, are warranted for a period of five (5) years, following the original date of purchase, against manufacturing defects. This warranty does not cover the normal wear of bristles, belts, carbon brushes and rolling bearings of the carpet beaters.
